

Please do not try to stop xm radio from broadcasting local weather and traffic reports. Who are they hurting by doing this. I think it is totally ridiculous that the NAB is even trying a stunt like this. You people at the FCC are trying to tell people what we can and can't watch or listen to. It ain't going to work here in the USA. At least you will not get away with it. Maybe the FCC should move to the USSR. You might be able to get away with messing with people's lives over there! Don't even try to mess with XM radio. You will not win!
